

**Join the Organic Revolution today
and be the difference you want to
see in the world.**

Plus, refer another business to the Revolution and
when they join we will give you one week free service
as a thankyou!

*Striving towards a world where waste isn't wasted
and trash becomes a resource.*

**THE
ORGANIC
REVOLUTION**

About the compost service

In 2019 Australia threw out 7.3 million tonnes of organic waste. If all food waste was avoided or recycled in methods such as composting Australia would avoid 18MT of CO₂-e - the equivalent of 15% of our Paris Agreement target.

On average 50-70% of general refuse in a hospitality venue is organic waste (not including recyclables) - this encompasses all food scraps, paper products (such as napkins and paper straws), and compostable packaging.

How it works

We work closely with you to launch the program within your business - establishing a tailored organic waste segregation system, educating staff, weekly check-ins, and ongoing support and promotion for joining the Revolution!

Our goal

Our goal is to divert **4.5 tonne** of organic waste from landfill over the next **six months**. To reach our goal we need **30 businesses** that want to make a difference!

Why this matters?

By diverting organic waste from landfill we support a circular economy and reduce our carbon footprint as just 1kg of organic waste decomposing in landfill produces 1.90kg of CO₂e!

The average cafe will produce around 150kg of organic waste per week - sending that waste to landfill is the equivalent of running 2.5x 50L petrol tanks to empty!

In February 2020 we collected 105,000 kg of organic waste from our #wastewisewa businesses and turned it into compost - this equates to taking 1,232 cars off the road for the month! If the Perth community works together we can make a significant impact to our environment by turning our waste into a new resource.

What's in it for your business?

- Bin hire, including lock to prevent external contamination
- Weekly waste collection and composting of waste
- Training and education of staff
- Customer liaison and management, with a weekly visit for 3-6 weeks
- Welcome pack: promotional & educational material, plus a bag of compost
- Social media promotion and inclusion on the Organic Revolution map
- Ongoing support and waste consultancy advice
- Discount on compostable liners with Ward Packaging
- Complementary BioPak compostable packaging digital promotional material
- **And community support for doing the right thing by our planet!**
